- Redux
- NextJS
- Tailwind CSS
- Bootstrap
- NestSJ

SOFT SKILLS

Soft Spoken | Remote Work | Collaboration

INTERESTS

Theatre-goer | Technology Enthusiast | Cooking | Wannabe Blogger

PROFESSIONAL SUMMARY

I am an aspiring web developer specialising in MERN stack. I have experience as a WordPress developer, running my own firm and creating websites for clients. Currently working as a SDE-1 at an e-commerce company. I primarily focus on front-end development but have recently started working on back-end development as well.

EXPERIENCE

IBO.com | Bengaluru | SDE-1 | August, 2022 - Present

REACTJS | NEXTJS | TAILWIND CSS | JAVASCRIPT | NESTJS

- Successfully developed, deployed and tested a pixel-perfect and responsive UI.
- I have implemented various features such as modifying the cart, obtaining geo-location access of users.
- Added an Install App pop-up feature, resulting in an massive increase in the number of app installs and users.
- Consistently worked on improving & enhancing features and performances.
- Developed few of RESTful APIs using NestJS on BFF layer.
- APIs were responsible for fetching data from core systems, consumed by front-end

Yashas Online Promoters | WordPress Dev | Oct 20 - Oct 21

- As a freelancer web developer, built few websites for my clientele using WordPress.

PROJECTS

Track Xpense |

An expense tracker app built using MERN stack.
Features

- User wise-data. Only user particular data is shown
- Signup & sign in. Authentication using JSON WEB TOKEN - JWT
- List of all transactions made by user

Tech Stack: Javascript | ExpressJS | MongoDB | ReactJS | Tailwind CSS | React-Router-Dom
Areas of Responsibility

- I worked on Frontend. Created own design.
- Created backend which connects database and UI

A solo project that I built in just 10 days.

React Project |

A complete MERN eCom project that sells various laptops.
Features

- Made responsive, Used React routers for all the routes
- Fetching products data from backend API
- Only logged-in users can add items to the cart

Tech Stack: Javascript | ExpressJS | MongoDB | ReactJS | Chakra UI | React-Router-Dom
Areas of Responsibility

- Added all necessary functionalities of an eCom website
- Used MongoDB as a database for storing all the data

A solo project that I built in just 10 days.

AJIO Clone | Pantaloons Clone |
